SUMMARY

I am a dedicated and motivated third-year Computer Science student at the University of Johannesburg, with a strong passion for solving real-world problems through technology. I have a solid foundation in programming, data structures, and software development and engineering, and I am eager to gain hands-on experience in the tech industry. I am a fast learner, an effective team player, and committed to continuous personal and professional growth. I am currently seeking opportunities to contribute to innovative projects while further developing my skills.

EDUCATION

University of Johannesburg **Feb 2024-Nov 2026**
BSc In Information Tech In Computer Science and Informatics

Zama High School **Jan 2018-Dec 2022**
Pure Mathematics And Commerce

TECHNICAL SKILLS

Programming Languages:
Visual Basic(.NET Framework) , Java, C++, SQL, C# (Beginner), JavaScript (Beginner)

Data Analysis & Visualization:
SQL, Microsoft Excel, R Studio

Database Design & Management:
SQL Server Management Studio , Draw.io, Dia

Statistical Analysis:
R Studio, Microsoft Excel

Data Cleaning: Microsoft Excel

Backend Development:
C# , Node.js

Version Control & Collaboration:
Git, GitHub

SOFT SKILLS

Effective Communication: Listen actively and explain concepts clearly.

Team Collaboration: Work well in group projects and contribute to brainstorming and problem-solving.

Time Management: Plan tasks efficiently, and meet deadlines.
Creativity & Innovation: Suggest and implement new ideas to solve problems.

Adaptability & Continuous Learning: Quickly learn new technologies.

Proactive Attitude: Take initiative in personal growth and skill development.

WORK EXPERIENCE

Marking Assistant **Feb 2026 – Present**

Department Of Computer Science and Software Engineering (UJ)

- Assess and grade weekly practicals and assignments for first-year Computer Science students
- Provide detailed, constructive feedback on code correctness, logic, and coding standards
- Assist students in understanding key programming concepts and improving problem-solving skills using C++
- Ensure consistency and fairness in marking according to departmental guidelines.

PROJECTS

Fundisa E-commerce Website(Github link unavailable) **Java Script , CSS , HTML**

- Collaborated in a 4-member team to develop an e-commerce platform aimed at helping high school learners explore university courses and career paths
- Designed and implemented backend functionality using Node.js and Express.js(not proficient in these frameworks)
- Developed and managed database structures in PostgreSQL to handle users, courses, and transactions
- Contributed to integrating frontend and backend components to ensure a smooth user experience

Ubuntu Cultural Connect Platform (Ongoing)
Web Technologies, Database Systems

- Contributing to the design and development of a platform that connects tourists with local cultural experiences and events
- Defining system features such as user preference input, recommendation generation, and experience rating
- Designing system architecture, use case diagrams, and subsystem interactions (administration, analytics, experience management)
- Working on enhancing personalized recommendations to improve user engagement

Wildfire Detection & Analysis System (Ongoing)

Java, Data Analysis, Graph Algorithms

- Developing a system to analyze wildfire patterns using publicly available datasets
- Cleaning, processing, and analyzing environmental data to identify high-risk areas
- Exploring graph-based models to represent regions and simulate wildfire spread
- Continuously improving data accuracy and visualization techniques for better insights

CERTIFICATIONS

World Quant University **Nov 2025 – Present**

Applied Data Science

HP Life **Feb 2026 – March 2026**

Data Science and Analytics

VOLUNTEERING

Mathematics Tutor (Volunteer)

- Provided tutoring support to Grade 12 learners, helping them understand core mathematical concepts
- Assisted with homework and assignments, strengthening learners' problem-solving abilities

Volunteering – UJ Community Engagement

- Participated in community outreach initiatives, including visits to local hospitals to assist with cleaning and general support services
- Distributed essential hygiene products to individuals in need, promoting health and dignity within the community
- Supported fundraising efforts by collecting donations (food and monetary) for financially disadvantaged students
- Contributed to maintaining a clean and organized campus environment during extracurricular events
